### education

- J.D., Southwestern University
- B.S., California State University, Mechanical Engineering

Danny focuses his practice on counseling clients in intellectual property matters, including conducting patentability, freedom-to-operate, and noninfringement due diligence investigations, as well as preparing and prosecuting patents for utility and design protection within and outside of the United States. Danny applies his experience to understand each client's unique technology and intellectual property goals, and implements strategies to efficiently and effectively build value for each client.

Danny has technical experience that spans a range of technologies, including medical devices and related procedures for patient ventilation, airway management, infusion management, drug delivery, intravenous therapy, medication and supply management, cancer therapy, glaucoma treatment, occlusion of targeted veins and arteries, and aesthetics implants and fillers.

Prior to law school, Danny provided engineering design and analytical services for a leading designer and manufacturer of military and commercial aerospace systems. While earning his bachelor's degree in mechanical engineering, he received the Honors Convocation Excellence and Achievement Award, in addition to honors from the College of Engineering and Computer Science.
